Ensure notice to performance issues even when 'out of app'
-  40+ TIRE CAPACITY AND 8-200 PSI CAPABILITY  
Provide users with unmatched monitoring abilities
-  USER CONFIGURABLE LAYOUTS AND ALERTS  
Allow users to customize units to their unique needs/set-up
-  VEHICLE/TRAILER NAMING AND STORAGE  
Adds ability to monitor and switch between multiple units

From real time, in-cab reporting direct to your driver's device, to comprehensive tire performance analysis, PressurePro's FX/Connect combo arms you with complete tire visibility, on the road or in the field.

## YOUR ENTIRE FLEET, AT YOUR FINGERTIPS.

In-cab. In the office. In the field. Connect provides unmatched visibility of your tires' performance.

Valve mounted Sensors report real time tire performance data via RF to the FX, in-cab.

FX utilizes Bluetooth to display data to drivers.

Data is delivered via cell to Connect, giving fleet managers actionable data.
